

Data Usage User Portal

The Twoobii service provides excellent performance when the user needs are aligned with the active service profile. To make sure you selected the optimum service profile, and to manage your daily usage, it is very informative to see the GB usage statistics for a particular site. For more information or support contact your Twoobii service partner or Twoobii support on service.team@qkon.com

To log-in; Go to <http://stats.twoobii.com/portal/login/> and Login with your: “*customer login*” and “*customer password*” credentials. Then click on “Sign in”

From the dashboard select;

- *Statistics*, and then *Internet* to view your Internet usages.
- *Profile*, to view the service profile set-up for your service.
- And at the bottom are options for *Print*, *Copy* and export to *Excel*, *CSV* or *pdf*.

Statistics / Internet Service: All Period: 01/05/2020 - 31/05/2020 Refresh

ONLINE SESSIONS					
Login	In	Out	Time	IP	Mac
Staff_Dawie_De_Wet	130.25 MB	4.59 MB	00:42:53	172.17.1.16	Mac

USAGE BY DAYS

Total data usage for receive (download) and transmit (Upload) per calendar day.

Sessions	Errors	Time	Download
4	0	73:54:57	35.83 GB

Usage in GB per session excluding Free Zone usage.

GRAPH

Data rates for In (Download) and Out (Upload) in Mbps with averages.

Daily graph (Staff_Dawie_De_Wet)

In speed	29.59 Mbps	Maximum	1.25 Mbps	Average	0.32 Mbps	Last
Out speed	2.69 Mbps		0.27 Mbps		0.02 Mbps	

FUP STATISTICS			
	Traffic / Bonus download MB	Traffic / Bonus upload MB	Online time
Day	1451.21 / 0	401.71 / 0	09:38:13
Week	11721.96 / 0	1641.74 / 0	24:41:29
Month	32883.58 / 0	5540.86 / 0	74:36:09

Data per day, per week and per month. The Twoobii FUP rules apply on usage “per day”. Once the download exceeds your profile quota then the receive data rates speeds will be limited.
